|---|---|---|
| Customizable Banking Software | Biometric Authentication | Bank Card Printing |
| Configurable Hardware | Video Conference Compatible | Smart ID Scanner |

The I64A, also known as the Smart Teller Machine (STM), is an intelligent banking terminal designed to provide seamless migration from mundane counter transactions to a self, assisted or remote service platform. The STM can automate transactions like opening a bank account, issuing a new bank card, applying for a loan, changing of particulars and much more! Migrating such services not only reduce customer queue and processing times, but also improves the efficiency of your branch tellers.
